

# Being born into a rich family gives people a head start in their career

AN UNPAID INTERNSHIP IN LONDON NOW REQUIRES PRIVATE FUNDING OF ALMOST £1,000 A MONTH

31% of graduate internships are unpaid

Monthly minimum cost of an unpaid internship

## What does this mean?

Some people say that inequality of outcome is not a problem as long as everyone has the same opportunity to succeed. But unequal outcomes cause unequal opportunities. Richer families can support their children through unpaid internships, making it easier to get the work experience necessary to establish a successful professional career. **So wider inequality creates bigger advantages for rich children, meaning it is more likely that they will go on to dominate the best-paid professions.**
